Heavy Metals Analysis

05 JANUARY 2021

BREEZY TREES

Product #	Lot #	Metals	Spec	Results
Green	5624	Arsenic	< 10,000 ppb	109 ppb
		Cadmium	< 4,100 ppb	27 ppb
		Lead	< 900 ppb**	446 ppb**
		Mercury*	< 300 ppb	13 ppb

Product #	Lot #	Metals	Results	Results
White	5625	Arsenic	< 10,000 ppb	107 ppb
		Cadmium	< 4,100 ppb	30 ppb
		Lead	< 900 ppb**	219 ppb**
		Mercury*	< 300 ppb	12 ppb

Product #	Lot #	Metals	Results	Results
Red	5626	Arsenic	< 10,000 ppb	67 ppb
		Cadmium	< 4,100 ppb	22 ppb
		Lead	< 900 ppb**	329 ppb**
		Mercury*	< 300 ppb	22 ppb

Sample Set: 120950

Heavy Metals (USA): PASS

Heavy Metals (CA): PASS

Heavy Metals Analysis

REVISION 999-1111

INFORMATIONAL RESULTS KEY

United States Pharmacopeia (USP) Limit for Nutritional Supplements:

- Arsenic 3.000 ppm / 3000.000 ppb
- Cadmium 3.000 ppm / 3000.000 ppb
- Lead 10.000 ppm / 10000.000 ppb
- Mercury 3.000 ppm / 3000.000 ppb

California Proposition 65 Daily Limits for Heavy Metals:

- Arsenic 10 ppm / 10,000.000 ppb
- Cadmium 4.1 ppm / 4,100.000 ppb
- Lead 0.5 ppm / 500.000 ppb**
- Methyl Mercury 0.3 ppm / 300.000 ppb

For labels with a single daily dose of 500mg, the PPM in products cannot be higher than:

- Arsenic = 20.000 ppm / 20,000.000 ppb
- Cadmium = 8.000 ppm / 8,000.000 ppb
- Lead = 0.900 ppm / 900.000 ppb
- Mercury = 0.600 ppm / 600.000 ppb

FDA Tolerable Daily Diet Lead intake:

- Children <6 years old = 6.000 ppm / 6000.000 ppb
- Pregnant women = 25.000 ppm / 25000.000 ppb
- Adults = 75.000 ppm / 75000.000 ppb

* Methyl mercury is included in total Mercury. Method AOAC 993.14 is equivalent to method ICP-MS USP <730>.

** California's Proposition 65 set up overly restrictive limits for many materials in relation to lead. There are many plants that have higher levels of lead than is acceptable in the State of California. One example is *Mitragyna speciosa*, which naturally has lead levels above 500 ppb.

This restriction will technically cause a FAIL for any material above 500 ppb in the State of California, which is why we have separated out that state from all the others in the USA.

If your CA result comes back as a "HI-LEAD", you may be required to place notices on your material, or it may be a material that cannot technically be sold for consumption in the state of California.
